Excerpts from ODP Div/Staff Reports for Week Ending 2 December 1983

Administrative Staff

Personnel:

STAT

EOD'd on 28 November for PD and SSD respectively.

STAT

EOD'd for ADMIN/LOGS on 28 November.

STAT
STAT

returned from a rotational assignment in DDI/PMS to PSG on 28 November.   (U)

Consulting and Assistance Group

STAT

Invalid characters were detected on the [   ] data base on 20 November. PD personnel worked with ED and SPD to resolve the source of the involved characters. The problem was traced to the line that filters in the T-Bar. There was no loss of

STAT

data. The [   ] data base was down to the user for two days. DBCC will continue to process a daily data trace analysis of

STAT
STAT

the [   ] data base for several days to ensure the problem has been fixed. [   ] (U)

The Trouble Desk handled a total of 695 phone calls for the week of 21-27 November; 500 incoming calls, 195 outgoing calls and 93 Wang calls. Of the incoming calls 128 reported

STAT

terminal problems. [   ] (U)

The six week Automated Data Processing Accelerated Curriculum (ADPAC) was completed by 15 students on 18 November. The Training & Information Branch provided the

STAT

student sponsors with final evaluations. [   ] (U)

The Training and Information Branch coordinated the enrollment of 10 ODP personnel in the IBM Project Management course. Special transportation was arranged for round-trip

STAT
STAT

travel to Crystal City from [   ] on 29 November-2 December. [   ] (U)

Consulting and Services Branch (CSB) is in the process of reorganizing the workflow for user contact, training, and

STAT
STAT

device checkout of the Xerox 2700s. [   ] is being assigned this task. [   ] (U)

CSB has distributed a memorandum to all ADP Control Officers concerning the upcoming move of Output Services Branch to the Northside Distribution Center. This is the first

ADMINISTRATIVE - INTERNAL USE ONLY

STAT

notification to the Community of the intended move, with more detailed information to follow in the coming months.

STAT [ ] (U)

Personnel:

STAT [ ] will attend the Television Production

STAT Workshop at Eastern Airlines facilities in Miami, Florida, from 5-9 December. [ ] (U)

STAT [ ] and three Hadron contract instructors will

STAT attend the Data Training Conference in San Francisco, California, from 11-15 December. [ ] (U)

Intelligence Systems Group

The first major enhancement to the CIA SAFE Early Capability, Delivery 1, was implemented on 21 November. To ensure operational stability of the enhancement, FBIS was the only message source included in the initial implementation and trial periods (21-25 November). The remaining seven message sources are being included in the Delivery 1 implementation at

STAT the rate of one per day beginning 29 November. [ ] (U)

IBM implemented a fix to SADDE software to correct the reoccurring SADDE failures on 23 November. The fix was applied to the module which interfaces CMS with PL1 programs. Since installing the fix, SADDE has not had a failure related to that

STAT software. [ ] (U)

Hardware changes will be completed on 30 November for the SAFE-D system and 1 December for the SAFE-C system. The changes will create floor space for the (four) additional 3380 B-units to be installed on the SAFE-C system. The delivery schedule has been delayed. The hardware will not

STAT arrive until 9 December. [ ] (U)

Delivery 3 Preliminary Design Documentation will continue to be reviewed in preparation of the Preliminary Design Review that will be held 12-16 December at TRW's W-1 Building.

STAT [ ] (U)

Personnel:

STAT [ ] completed security processing and received

STAT her Agency badge on 30 November. [ ] (U)

Management Information Systems Group

The T&A Team met with [blank] of SPD to learn more about what AIM is and how it fits into the T&A architecture. The meeting was most beneficial. AIM has some very attractive features: a) system-to-system interface; and, b) automatic error recovery. We also discussed again our present thinking of using NOMAD2 as a VM data base for T&A collection. We are looking into the possibility of merging the existing NOMAD2 architecture with AIM for the system-to-system interface. Last week we tried a simple exercise with each ACIS team member calling up a simple T&A menu for the purpose of testing response time. We only had about 20 users but the
response was excellent. [blank] (U)

The LIMS Quality Assurance Contractor (CTEC) delivered the final Requirements and Design Document for the Configuration Item Index Enhancements to the Quality Assurance Status Accounting System. Programming has been completed on the first phase, and Configuration Item Index Reports are now being produced from QASAS rather than WANG. Programming on the library functions and distribution lists is delayed due to lack
of resources for GIMS programming. [blank] (U)

The award fee for LIMS Quality Assurance Contractor (CTEC) has been determined, and a memorandum stating such will be
forwarded to the Contracting Officer. [blank] (NO CONTRACT)

Configuration Management Branch (CMB) personnel provided assistance to SAFE Project representatives in their evaluation of the PANVALET-VM System for baselined software storage. Two problems have surfaced; multiple accesses to PANVALET and the
Cross Reference Sort Program abend. [blank] (SPD) is trouble shooting the problem of accesses and Mike Boushell (Pansophics technician) is checking out the sort problem. These problems should be resolved next week and testing will
continue. [blank] (U)

A draft of the updated TADS Five-Year Plan was distributed for OSWR review on 23 November. Pending finalization of the budget plan and integration of comments, the document will be
distributed for ODP internal review on 1 December. [blank] (U)

On 22 November, Quality Systems, Incorporated (QSI), briefed OP on the efficiency and effectiveness of Project Caper. This was followed by a QSI recommendation for improvements and enhancements. The briefing was well received, and OP will review and prioritize the proposed recommendations
so work can continue with minimum delay. [blank] (U)

ODP is prepared to install the OP Microdata Minicomputer
in Room 3N08, [blank] Building, on 1 December as specified in the CAPER Installation Plan. However, the construction work

and TEMPEST certification on Room 3N08 is approximately one week behind schedule and the mini-installation has been rescheduled for 5 December. OP has been advised of the changed schedule. _____ (U)

STAT

The Army Government organizations and personnel data were loaded into the 4C database. _____ (U)

Management Staff

1985 Congressional Budget. The "hit numbers" for the 1985 Congressional Budget were received on 28 November. As anticipated, there was a reduction of SSR positions (four in 1984 and three in 1985). Also, there were Congressionally directed reductions in both 1984 and 1985 for external assistance (contractual and maintenance services) and in the inflation factor. The DDA adjusted our FTE levels to provide in 1984 and 1985 for the level of temporary part-time support we used in 1983. Overall, our non-personal service funds were reduced by 3.6% in 1984 and 2.2% in 1985 from the levels in our OMB Budget. These reductions do not apply to the CAMS funds which have recently been transferred to our budget. _____

Special Systems Group

A second requirements data base has been created and was shipped to the Tasking Segment on 22 November. The successful completion of this task was facilitated by exceptional support provided to the CAMS2 (P/S) development contractor (TRW) by OD, SPD, and PD. (U)

STAT

As of 21 November, 62 of 129 integration tests were completed. The internal completion on integration testing will be rescheduled for early January. (U)
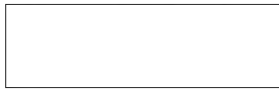

STAT

The Critical Design Review (CDR) for the IDM backup and recovery capability was held on 28 November. There were no changes to the design document as a result of the CDR. This design document is expected to be finalized by 30 November. (U)

1 December 1983
ODP 83-1724

MEMORANDUM FOR: Deputy Director for Administration

STAT
FROM:

Director of Data Processing

SUBJECT: ODP Report for Week Ending 2 December 1983

1. COMIREX Automated Management System (CAMS)

The systems integration sole-source contract was presented to the Contracts Review Board on 22 November. The decision of the Board was to grant a sole-source contract to Synectics Corporation for three years. There will be an annual reevaluation for the renewal of the contract during this three-year period.

2. Significant Events During Coming Weeks

None.
